INTERNATIONAL PRELIMINARY
EXAMINATION REPORT

International application No. PCT/US00/25685

I. Basis of the report

1. With regard to the **elements** of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):
Description, pages:

1-29 as originally filed

Claims, No.:

1-14 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- the language of publication of the international application (under Rule 48.3(b)).
- the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- contained in the international application in written form.
- filed together with the international application in computer readable form.
- furnished subsequently to this Authority in written form.
- furnished subsequently to this Authority in computer readable form.
- The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- the description, pages:
- the claims, Nos.:
- the drawings, sheets:

5. This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/US00/25685

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N) Yes: Claims 2, 4-14
 No: Claims 1, 3

Inventive step (IS) Yes: Claims
 No: Claims 1-14

Industrial applicability (IA) Yes: Claims 1-14
 No: Claims

2. Citations and explanations
see separate sheet

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/US00/25685

1. The authorised officer assumes that the concept of adding a laundry treatment composition containing a suds suppressing system to an aqueous laundry rinse bath formed part of the state of the art at the priority date.

Measured against that prior art, claims 1 to 14 of the international application are considered not to involve an inventive step within the meaning of Article 33(3) PCT because none of the features recited in those claims would appear to be both

- such as to ensure the solution of a meaningful technical problem derivable from the application as filed and
- such as to define a teaching going beyond merely stipulating a technical result any person skilled in the relevant technical field would have considered desirable and beyond what is suggested by the common general knowledge in the relevant technical field.

Concerning the feature recited in claim 1 of the treatment composition having "a clarity value upon a 0.2% dilution of less than a 0.04% by weight of a dimethyl bis(steroyl oxyethyl)ammonium chloride aqueous solution" , attention is in particular drawn to the fact that it is not apparent that a meaningful technical problem should be solved by the teaching to the effect that the diluted treatment composition should be **less** clear than an aqueous solution containing 0.04 % by weight of dimethyl bis(steroyl oxyethyl) ammonium chloride.

2. As acknowledged in the description of the international application, suds suppressing systems of the types defined in claim 3 were well-known at the priority date of the application.

The authorised officer assumes that at least some of the prior art antifoam compounds meet the requirement of having "a clarity value upon a 0.2% dilution of less than a 0.04% by weight of a dimethyl bis(steroyl oxyethyl)ammonium chloride aqueous solution" and the requirement of having "a suds reduction value of at least 50%".

It is concluded that the inventions defined by claims 1 and 3 lack novelty within the meaning of Article 33(2) PCT.
